Econz Wireless Workforce Management Solutions Including Dynamic GPS Tracking, Robust Reporting, PDF Forms, Time, Attendance, and more.

Timecard is a mobile workforce management application that generates PDF forms, photos, digital signatures, GPS tracking information, job costing, time, and attendance from a Smart Phone or tablet.

The mobile data captured helps employers manage their mobile workforce better by increasing productivity, reducing time-theft, and streamline the back-office payroll processes.

View individual worker details including activity and current positions.

The 'Breadcrumb' trail views shows speed direction, location and status of workers.

Covid-19 Self-Assessment Forms and Surveys
