- PCI DSS Compliant (Payment Card Industry Data Security Standards)
- Customised offerings combining Vodacom Telco and Insurance products with payment services

Who we are

About us

Vodacom Financial Services facilitates transactions by providing merchants with various payment acceptance methods the consumer can use to pay for goods and services.

Easy on-boarding and sign-up

An easy and simple application process gets you onboarded quickly. Go to <http://voda.com/accept-payments> to sign up for our payment solutions.

What is POS?

POS stands for Point of Sale. The POS can be either a physical or virtual payment device that enables you to conduct secure payment transactions without carrying and handling cash.

- It eliminates the need for you to carry/keep cash on the business premises
- It provides a safe way for your consumers to pay for goods

Payment device types

- VodaPay Max (Standalone Device)
- VodaPay Chop-Chop (Scan to Pay)
- E-commerce Gateway

Charges for Payment Devices

- VodaPay Max – rental
- VodaPay Chop-Chop – no costs, it's free!
- E-commerce Payment Gateway – API integration costs

What is VodaPay Chop-Chop (Scan to Pay)?

Scan to Pay is a convenient, safe method where payment is performed by customers using a mobile app such as VodaPay/Masterpass/Zapper/Snapscan/Banking App on their phones to scan a Quick Response (QR) code – an alternative to using physical cards. We like to call our QR Code VodaPay Chop-Chop because it's quick and easy to pay! Your competitors do it "Now Now", but with the QR code you can do it "Chop Chop"!

Scan to Pay benefits

- No rental fees
- Payment possible during power cuts
- Queue busting
- No setup costs for standalone/static codes

What is an E-commerce Payment Gateway?

An E-commerce Payment Gateway is a merchant service provided by an e-commerce application that authorises debit/credit card or direct eft payments processing for e-businesses, online retailers, bricks and clicks or traditional brick and mortar businesses.

Basically this is the final stage of the sales process on an ecommerce website/mobile app where merchants and buyers can conduct secure payment transactions online.

It allows customers to pay with their credit/debit cards or make an eft payment virtually.

Merchant portal

The fastest and most efficient way to keep track of your business performance with real-time data.

Our portal puts you in control of your business by providing a full view of sales transactions, fees and settlements.

To manage your business have access to reports in real time to assist you with reconciliation and close of day processes.
