Spend bearer locking limited to administrator portal

Spend limit managed by admin

3

Option to top-up with voice / data bundles

* Fraud prevention policy applies

** Vodacom on-network RT15-2021 calling / SMS

Mobile Offer 1: **Always Connected Work+** with a hardware fund per plan

The **Always Connected Work+** plan includes an Enterprise Ticket; this ticket allows uncapped use of work-related applications. National Treasury and each department are requested to make available the list of applications that they use for work, and these applications / services will be added to the Enterprise Ticket.

All plans include a voice and SMS closed user group (CUG), allowing unlimited calls / SMS' between colleagues who are also making use of a Vodacom RT15-2021 plan (i.e. calls to and from RT15 colleagues using Vodacom will be zero-rated).

There are 3 main **Always Connected Work+** plans, that differ in the allocation of anytime minutes and anytime data. These allocations are separate and distinct from the Always Connected voice and SMS CUG, and the applications / services covered by the Enterprise Ticket. This allows participants of these **Always Connected Work+** plans to control their spend and decide how much of their application usage and communication (voice and SMS) is to non-Vodacom RT15 users. Spend limits are in place across all plans except for the Enterprise Bundle, where the spend limit is enforced by the administrator of the department.

All options include free CLIP, itemised billing and a hardware fund for a device. **Always Connected Work+** plans are ideal for users who access a similar set of applications / services, and where access to work applications is always unrestricted, but access to the open Internet is capped to the amount of anytime data in the chosen package. A fraud prevention policy is in place across the voice (CUG), SMS (CUG) and Enterprise Ticket data usage. Users will have access to an unrestricted set of bundles that can be added to this package, either by bank card or departmental administrator.

Mobile Offer 2: Always Connected Anytime with a hardware fund, for only R500

Default Spend Limit per employee

* Fraud prevention policy applies

** Vodacom on-network RT15-2021 calling / SMS

Mobile Offer 2: **Always Connected Anytime** with a hardware fund, for only R500

The **Always Connected Anytime** plans have a large amount of anytime data allocated; this allows work-related applications to be used, when those applications include a large mix of known and unknown applications and services. Users on an Anytime plan will not be restricted from accessing Internet accessible applications.

All plans include a voice and SMS closed user group (CUG), allowing unlimited calls / SMS' between colleagues who are also making use of a Vodacom RT15-2021 plan (i.e. calls to and from RT15 colleagues using Vodacom will be zero-rated).

There are two **Always Connected Anytime** plans, that differ in the allocation of anytime minutes, anytime data and hardware fund allocation. These allocations are separate and distinct from the Always Connected voice and SMS CUG. This allows participants of these **Always Connected Anytime** plans to control their spend while allowing unrestricted access to the Internet. Spend limits are in place across all plans.

All options include free CLIP, itemised billing and an allocation for a handset. **Always Connected Anytime** plans are ideal for users who access a diverse set of applications / services (including social and streaming services), where access to these applications is always unrestricted. Access to the open Internet is capped to the amount of anytime data in the chosen package. A fraud prevention policy is in place across the voice (CUG), SMS (CUG) and anytime data usage. Users will have access to a restricted set of bundles that can be added to this package, either by bank card or departmental administrator.

Mobile offers | Further information

- **What type of an account can be opened?**

Corporate accounts can be opened across all package options, including Top-Ups Corporate Individual accounts (e.g. sponsored billing) are also available for all packages, except for the Enterprise Bundle option. In this scenario, the main account will be in the name of the corporate (Department) and the sub-account in the name of the individual (typically the employee), with both credit vetted individually.

- **Can the mobile services be customised?**

Yes, mobile services (i.e. the mix of anytime voice, SMS and data) can be customised by adding optional bundles for all Always Connected Work+ packages. Additionally, Business Flex and Enterprise Bundle options allow for the tariff to be adjusted without adding optional bundles (i.e. changing the base plan). In both cases, that customisation is done per department. Users within a department can be on any mix of the package plans available.

- **What happens when mobile services are depleted?**

All Always Connected packages will not restrict voice or SMS calls to other Vodacom RT15 package plans. Always Connected Work+ users will not be restricted from accessing applications contained in the Enterprise Ticket; similarly, Always Connected Anytime users will not be restricted from accessing the Internet. Once allocations are depleted, it can be topped up. All plans allow for bundle purchases for additional anytime data, anytime minutes and anytime SMSs, should it be required.
