It is advised to use wireless Access Points (AP's), WiFi Beacons or extenders in scenarios where you want to connect more than 20 devices to the Business Internet router to ensure optimal throughput.

What is VoIP

VoIP uses the latest IP technology to provide high – quality voice transmission services over data

VoIP can be utilized by businesses of all sizes

You can combine voice and data transfer over the same line, providing an integrated package, with a single point of accountability and service

Confidently connect your business

Business Internet LTE

Plug-and-Play LTE gives your business the flexibility it needs to keep it always-on. Choose from Capped BizDay plans (8am – 5pm), Anytime Data plans with a fair usage policy, and SIM-only plans with Anytime and BizDay data.

Business Internet Wireless Air

Reliable uncapped Internet with speeds up to 30Mbps.

Business Internet Wireless

Uncapped fibre-like Internet with speeds up to 80Mbps.

Business Internet Fibre

Uncapped Fibre & Fibre Premium offers scalable internet solutions for businesses of all sizes with speeds of up to 200Mbps.

Business Internet 5G

5G speeds of up to 100Mbps+ give your business the edge. Choose from a Plug-and-Play setup or a technical installation for a true business-grade experience.

What is Business Internet LTE?

Vodacom Business Internet LTE is our Plug-and-Play LTE offering ideally suitable for replacing copper-based ADSL connectivity. Cable theft will no longer be an issue with LTE. This service uses the Mobile Radio Access Network (RAN) as the “last-mile” to access “fixed-line” data and voice services. It gets you connected in no time with a walk-out-working option where you buy the service from a Vodacom retail outlet and be up and running as soon as you get to the office. Choose from capped plans with BizDay bundles (8am – 5pm), Anytime data with a fair usage policy, or SIM-Only plans.

What you get

- 25Mbps National average throughput
- Capped offerings or anytime data with fair usage policy
- Router and SIM ready to self install
- Dynamic IP address
- Plug-and-Play
- Basic VoIP capabilities

Business Internet LTE

BI LTE with Bizday bundles

Anytime Data	Bizday data (8am-5pm)	Total Data (Anytime + Bizday)	SIM only p/m x 24	SIM only p/m x 36	Router incl p/m x 12	Router incl p/m x 24	Router incl p/m x 36
5GB	5GB	10GB				R139	R129
10GB	10GB	20GB				R189	R169
20GB	20GB	40GB			R299	R229	R189
50GB	50GB	100GB			R379	R299	R269
150GB	100GB	250GB	R299	R249		R349	R299
300GB	200GB	500GB	R599	R549		R649	R599

* When the Capped allocation is reached, you can continue using data by buying Top up bundles

* All plans include a TP Link MR600 router (except for SIM Only plans)

* SIM only implies that you take up a SIM card only, no router is included

BI LTE with fair usage policy (FUP)

BI LTE FUP plans	Router incl p/m x 24	Router incl p/m x 36

20Mbps	R499	R449
30Mbps	R599	R549

* A Fair Usage policy applies to these plans.

Terms and Conditions

- All pricing includes VAT
- This is a Plug-and-Play service
- TP link MR600 and SIM included for all BI LTE plans except SIM-Only
- SIM-Only plans use either of the following routers: TP Link MR600, HUAWEI B535 and Alcatel HH72V
- Anytime and BizDay data bundles expire in 60 days
- Bizday Data available for use daily 8am – 5pm
- Unrestricted bandwidth speed can reach 100Mbps, average = 25Mbps
- Call 082 1940 for LTE support

What is Business Internet 5G?

Business Internet 5G is the natural evolution of the LTE network, offering faster speeds, and lower latency, enabling users to connect multiple devices to the internet and enjoying a smooth and uninterrupted online experience. Customers can choose between a Plug-and-Play self-installed service, or a technically installed service that includes a 5G receiver on the outside of your premises. The technically installed service is better suited for customer's who have server rooms in basements or locked up environments where sufficient signal would be difficult to achieve.

What you get

- Best effort 5G speeds
- Anytime data with generous fair usage policies
- Dynamic IP address with the option of 1 Static address if required, for an additional fee
- ZTE Router
- Choice between a Plug-and-Play setup or a technical installation

Business Internet 5G (Indoor)

Plan	Speed	24 Months	36 Months
BI 5G 25Mbps	Up to 25Mbps	R699	R649

What is Business Internet Fibre?

Business Internet Fibre is the superfast, reliable way to access the Internet. Vodacom's Business Internet Fibre plans provide the high-speed, secure fixed-line access that your business needs. Choose from dynamic or static IP addresses, uncapped plans, symmetrical upload, and download speeds, and various optional value add-ons, such as One Net Business. Vodacom builds its own fibre network, but also makes use of third party providers in certain areas. Business Internet Fibre offers high speed internet connectivity fully installed with a router. It offers symmetrical throughput with no monthly limits on data usage.

What you get

- Free installation on selected plans
- Free LTE Uncapped while you wait (Offer valid for 1 month)
- Free 50GB back up over LTE for the duration of the contract
- Speeds of up to 200Mbps
- Uncapped and Unthrottled plans
- Symmetrical and asymmetrical bandwidths on Vodacom Business Premium and third-party network service plans
- Dynamic and static IP addresses
- Port in your geographic landline numbers (021, 031, 041 etc) or Vodacom Business can allocate a new geographic or non-geographic landline number (087)
- Cost savings with VOIP of up to 20% on your Voice calls

Business Internet Fibre Lite on the Vodacom Network
