Business Internet Fibre

Business Internet Fibre is a fast and reliable way to access the Internet. A business requires stable upload and download speeds, scalability, and reliability to pave the way to the digital era. Vodacom's Business Internet Fibre plans provide the high-speed, secure fixed line access that your business needs. Choose from dynamic or static IP addresses (see next page for definition), uncapped plans, symmetrical upload and download speeds, and various optional value add-ons, such as Hosted One Net Call Centres, One Net Business and other additional voice and hosting services to enhance your connection.

Business Internet Fibre offers wireless connectivity and is fully installed with a router that includes USB and telephony ports.

You get:

- Uncapped and Unthrottled (No fair usage policy)
- **Free installation on selected plans**
- Free LTE Uncapped while you wait (Offer valid up to 1 month)
- Free 50GB LTE failover for the duration of the contract
- Speeds of up to 200Mbps, on selected Fibre network providers
- Symmetrical bandwidths on Vodacom Premium and third-party network service plans
- Dynamic and static IP addresses
- Supports Voice calling
- Optional fixed Voice line
- Port in your Geographic landline numbers (021, 031, 041 etc) or Vodacom can allocate a new Geographic or Non-Geographic landline numbers (087)
- Cost savings of up to 20% on your Voice calls

Helpful terminology:

- **Uncapped:** No limit on the amount of data that can be downloaded
- **Static and Dynamic IP addresses:** A Static IP Address is usually required if you need to manage servers remotely and need to know the exact IP addresses Eg : For CCTV cameras and management servers
- **Symmetrical:** Same upload and download speeds. Businesses like designers or architects that upload large graphic files or businesses that have high usage on fixed voice would require substantial upload speed as well
- **Asymmetrical:** Different upload and download speeds with upload speed usually being slower than download speed, suitable for accessing the internet
- **Contention ratio:** All Broadband services are 'contended services', implying that the bandwidth is shared, so users contend for it – and the more users, the slower the service, i.e. during peak times daily if the network becomes congested

Selecting the right fibre plan for your business:

Always start by entering your address on the Vodacom Coverage map online, as it will show you what infrastructure is available in your area. Key factors to consider are: coverage, throughput/speed and number of concurrent users that will use the service.

Features & Benefits	Premium Uncapped	Uncapped
Service plans	Uncapped (10Mbps - 200Mbps)	Uncapped (10Mbps - 200Mbps)
Usage	Unthrottled (No fair usage policy)	Unthrottled (No fair usage policy)

Making the call

You can also use your Fibre service to make voice calls. Port your existing landline number (021, 031, 041 etc) or Vodacom can assign you a new landline number (087, 021, 031, 041)

This can save you up to 20% on your monthly voice bill. This way you also get free Vodacom-to-Vodacom calls when calling from one landline number to another. The quality of voice calls depends on factors like the number of users on your line, download/upload speed, etc.

A committed voice channel can be subscribed to on your Fibre service that allocates dedicated bandwidth to the voice service.

Business Fibre terms and conditions

- Premium Business Fibre is now available on Vodacom & Link Africa Malls .
- Free installation is available for a limited period and on selected price plans.
- Timelines for the deployment of infrastructure will vary, but it usually takes 2–8 weeks, depending on the third-party network providers.
- Should you have to wait for your Business Internet Fibre, we offer LTE while you wait. This means you will be connected within 48 hours and the service is available for period of up to 3 months.
- Premium pricing includes one static IP address. An extra R125 (VAT incl) charge is applicable should you require 5 static IP addresses.
- Visit your nearest store, search Business Internet Fibre or call 082 1960 to apply for Business Internet Fibre
