Business Internet Fibre

Business Internet Fibre is a fast and reliable way to access the Internet.

A business requires stable upload and download speeds, scalability, and reliability to pave the way to the digital era. Vodacom's Business Internet Fibre plans provide the high-speed, secure fixed-line access that your business needs. Choose from dynamic or static IP addresses (see next page for definition), uncapped plans, symmetrical upload and download speeds, and various optional value add-ons, such as Hosted One Net Call Centres, One Net Business and other additional voice and hosting services to enhance your connection

Business Internet Fibre offers high-speed connectivity and is fully installed with a Wi-Fi-enabled router that includes a USB port and a number of LAN ports

You get:

- Uncapped and Unthrottled (No fair usage policy)
- Free S90 Ultra or H3C Router
- Free installation on selected plans
- Uncapped LTE while you wait for your fibre installation to be completed, free for the first month
- Free 50GB LTE failover for the duration of the contract
- Speeds of up to 1000Mbps on selected Fibre network providers
- Symmetrical bandwidths on Vodacom Premium and third-party network service plans
- The choice between Dynamic and Static IP Addresses
- Supports Voice calling
- Optional fixed Voice line
- Port in your Geographic landline numbers (021 031 041, etc) or Vodacom can allocate new Geographic or Non-Geographic landline numbers (087)
- Cost savings of up to 20% on your Voice calls

Multiple concurrent users

FIBRE

Free LTE should you wait for installation

Free LTE backup for contract duration

Includes router

VoIP ready

Up to 200Mbps and more

Uncapped

Helpful terminology:

- Uncapped: No limit on the amount of data that can be downloaded
- Static and Dynamic IP addresses: A Static IP address is usually required if you need to manage servers remotely and need to know the exact IP addresses, e.g., for CCTV cameras and management servers
- Symmetrical: Same upload and download speeds. Businesses like designers or architects that upload large graphic files or businesses that have high usage on fixed voice lines would require a substantial upload speed as well
- Asymmetrical: Different upload and download speeds with the upload speed usually being slower than the download speed, suitable for accessing the internet
- Contention ratio: All Broadband services are 'contended services', implying that the bandwidth is shared, so users contend for it – and the more users, the slower the service, i.e., during peak times if the network becomes congested

Selecting the right fibre plan for your business:

Always start by entering your address on the Vodacom Coverage map online, as it will show you what infrastructure is available in your area. Key factors to consider are coverage, throughput/speed and number of concurrent users that will use the service. Note all services are feasibility dependent

Features & Benefits	Premium Uncapped	Fibre Lite
Service plans	10mbps – 1000mbps	10mbps – 1000mbps
Contention ratio	10:1	20:1
Upload and download ratio	Symmetrical/Asymmetrical*	Symmetrical/Asymmetrical*
Service type	Uncapped (no fair usage policy)	Uncapped (no fair usage policy)
Routers	S90 Ultra or H3C	S90 Ultra or H3C
IP addressing	Static IP address (optional 5 at additional cost)	Dynamic IP address
Optional add-ons	Voice Services (VoIP) Interim and Backup (LTE)	Voice service (VoIP) Interim and Backup (LTE)
Contract terms	12, 24, and 36 months	12, 24 and 36 months

*Symmetrical (upload = download speed)/Asymmetrical (upload= half download speed)

Business Internet Committed Voice Channel (CVC) Plans

CVC Speed Options (Mbps)	12-month contract	24-month contract	36-month contract
0.5Mbps	R99	R97	R96
1Mbps	R199	R195	R193
2Mbps	R299	R293	R290
4Mbps	R399	R391	R387
8Mbps	R599	R587	R581
10Mbps	R799	R783	R775

Disclaimer: Please note that the Committed Voice Channel cannot be offered to customers as a standalone product, it is only available as a bundled service with a new Business Internet Fibre premium on Self-built or selected Bitstreams

Making the call

You can also use your Fibre service to make voice calls. Port your existing landline number (021, 031, 041, etc) or Vodacom can assign you a new landline number (087, 021, 031, 041)

This can save you up to 20% on your monthly voice bill. This way, you also get free Vodacom-to-Vodacom calls when calling from one landline number to another. The quality of voice calls depends on factors like the number of users on your line, download/upload speed, etc

A committed voice channel can be subscribed to your Fibre service that allocates dedicated bandwidth to the voice service

Business Internet Fibre terms and conditions

- Free installation is available on selected price plans
- Timelines for the deployment of infrastructure will vary, but it usually takes 2–8 weeks, depending on the third-party network providers
- Should you have to wait for your Business Internet Fibre, we offer LTE while you wait. This means you will be connected within 48 hours and the service is available for a period of up to 3 months
- Premium pricing includes one static IP address. An extra R125 (VAT incl) charge is applicable should you require 5 static IP addresses
- All pricing included in this document is VAT inclusive
